Potatoes

Maximise your crops' potential with Aphasol biostimulant

**INCREASED
YIELD**

**ENHANCES STRESS
RESILIENCE**

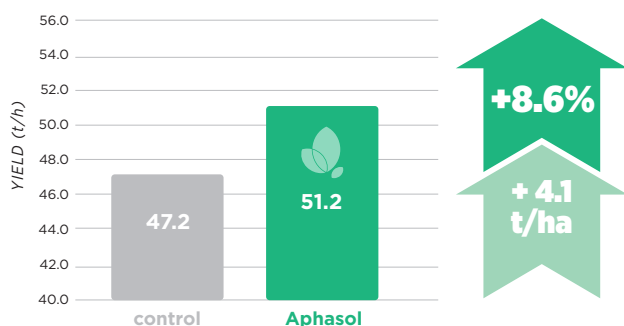

**IMPROVES NITROGEN
USE EFFICIENCY**

Aphasol is a powerful liquid biostimulant for foliar application. It improves nutrient uptake and efficiency in potato crops, resulting in higher yields and larger tuber size. When used preventively, it strengthens the plant against stress such as drought, heat, and nitrogen deficiency.

Aphasol: for healthy crops, vigorous growth, and maximum yield.

Trial results

Yield results 32 trials (2021-2024)

94%

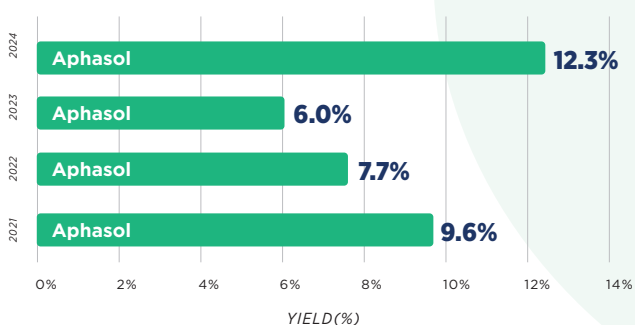

94% SUCCESS RATE

In 30 out of 32 trials, Aphasol had a positive impact and resulted in increased yield.

Year-on-year performance in potatoes

Consistent, proven results across four highly contrasting seasons.

Product description

- Liquid biostimulant based on amino acids and peptides.
- Circular: made from poultry feathers.
- Sourced from untreated raw materials from local poultry farms.
- Developed and produced in Belgium.

Application advice

- **Aphasol is a foliar application.**
The product is water-soluble and can be applied in combination with most common fertilisers and crop protection products.
- **Dosage: 5 x 3 L/ha.**
Starting at row closure stage (BBCH 37-39)
- **Shake well before use.**
The addition of a wetting agent is recommended.
Tank mix concentration: 2-5% Aphasol.
Add Aphasol to the pre-diluted tank mix..
- Variant available for organic farming:

“Aphasol Aphasol delivers visible yield gains in my potatoes — especially in tough, high-stress seasons. I've also been able to cut back on fertiliser, which saves money. And if stricter regulations come in tomorrow, I already know what works.”

— Stephane Verhaeghe, Anzegem
